.NET SOFTWARE DEVELOPER

Otoconsult is a medical software and consultancy company developing innovative solutions for professionals, and a pioneer in the use of Artificial Intelligence in the field of audiology, otorhinolaryngology and acoustics. It was founded in 2007 as a spin-off from the Eargroup, a clinical research center based in Antwerp and one of the reference centers in the field of cochlear implantation.

Otoconsult's market is growing fast in North-America, and to support its expansion and develop new applications that keep pushing boundaries to help improve people's life, Otoconsult is recruiting a **.NET Software Developer**.

Your role comprises:

- Contributing to the development and extension of our software portfolio: you analyze, design and develop new software applications and components;
- Test-driven programming: you develop, implement and execute a robust and qualitative test plan for these new developments;
- You are closely involved in the whole software development life cycle, from idea to innovative product.

YOUR PROFILE

- You successfully obtained a Bachelor's degree in (Applied) Informatics, Industrial sciences or equivalent by experience;
- You have proven skills and 3-5 years of experience in Microsoft .NET (C# and SQL Server) and a definite interest in mobile app development (Android and iOS). Knowledge of cloud technologies is a plus;
- You have medium to advanced knowledge of Agile/Scrum methodologies; You have medium to advanced knowledge of Agile/Scrum methodologies and experience with Microsoft ALM tools such as TFS and Visual Studio;
- You are a pro-active and open-minded team player that cooperates to obtain our team goals, enthusiastic to work in a highly varied, technological and innovative environment, passionate about changing the life of people;
- You have excellent oral and written communication skills, as well as good knowledge of technical English.

WE OFFER

- A full-time and permanent contract in a human-sized company, with an attractive salary package;
- The unique opportunity to collaborate to the growth of a young company from an ambitious pioneer to the international authority in the niche of professional software for Ear-Nose-Throat practitioners, audiologists and cochlear implant centers.

HOW TO APPLY?
