

# Quality Manager

Otoconsult is a [software SME](#) in Antwerp that makes medical software.

Our main product is [Audiqueen](#), an application used in many hospitals in Belgium and abroad. Audiqueen exchanges data with medical devices and with the hospital patient file.

Our team is known worldwide for its involvement in many aspects of audiology and cochlear implantation. Software development is of a high professional standard with ISO 13485 certification by the German quality institute TÜV SÜD. Otoconsult is a spin-off company from the [Eargroup](#) medical team and is housed in the same building with daily contact between the programmers and the medical staff.

We are looking for a

## **quality manager for medical software (M/F)**

Your function:

- Quality Management (in cooperation with an external consultant)
  - Daily monitoring of the internal QMS (quality management system)
  - Keeping the QMS up to date, with all documents and procedures to be followed by the software developers to ensure a high quality software life cycle
  - Preparing and organising quality management meetings
  - Annual preparation and supervision of the audit carried out by TÜV SÜD
- Software development and testing
  - Writing and executing test plans
  - Writing robotic tests for automatic testing of software user interface
  - Analysing and fixing bugs reported by our users
- Possibly also the calibration of medical devices in hospitals in the country

Your profile:

- You have completed higher studies with a technical background, such as Software development, Physics, Bioengineering, Industrial Engineering, etc.
- Knowledge of QMS is not a requirement; we will train you in ISO 13485 and in all aspects of QMS and our software
- You like order, precision, control
- You like independent work and supervising the work of others

If you are interested, please send your CV to David PASCOAL ([pasocal@otoconsult.com](mailto:pasocal@otoconsult.com)).
